EX.NO:04 APPLICATION USING ZIA – LIBRARY MANAGEMENT SYSTEM

ROLL NO: 240701573

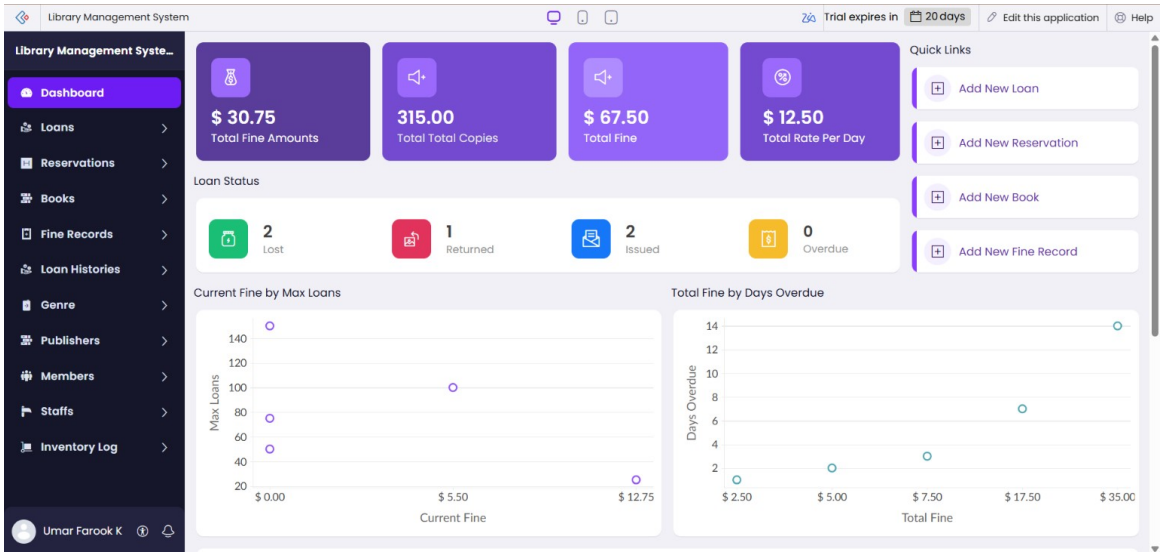

NAME : UMAR FAROOK K

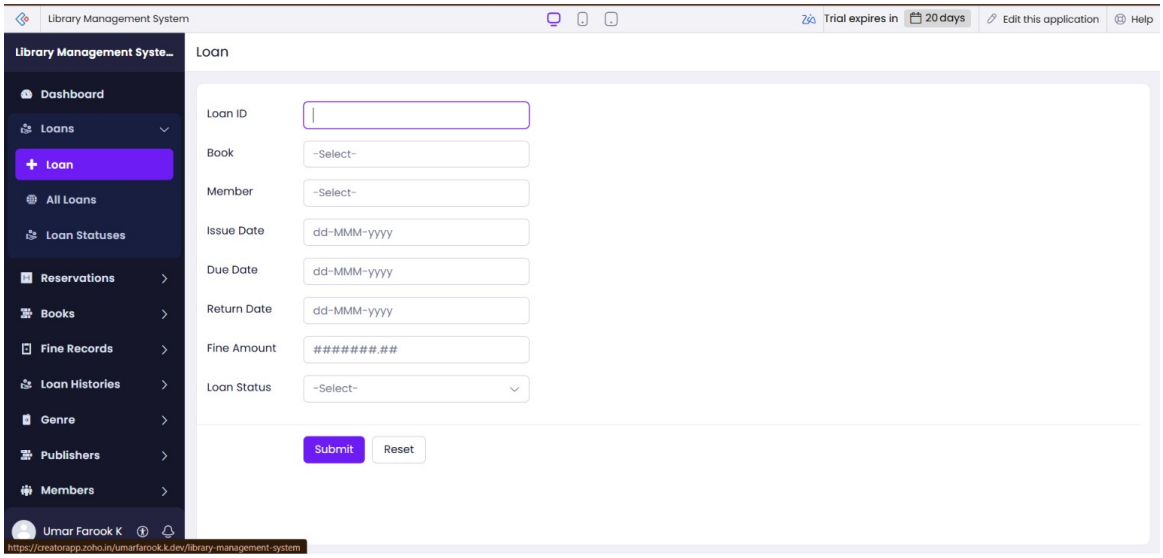

AIM:

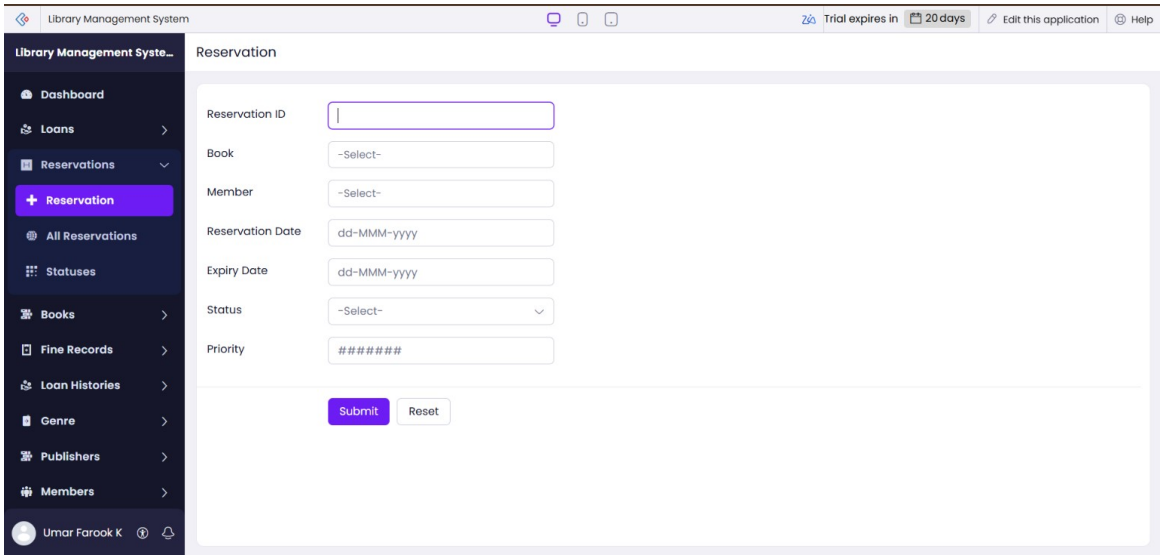

To design and build a Library Management System application in Zoho Creator using Zia, the AI assistant, for managing books, members, loans, reservations, fines, genres and publishers.

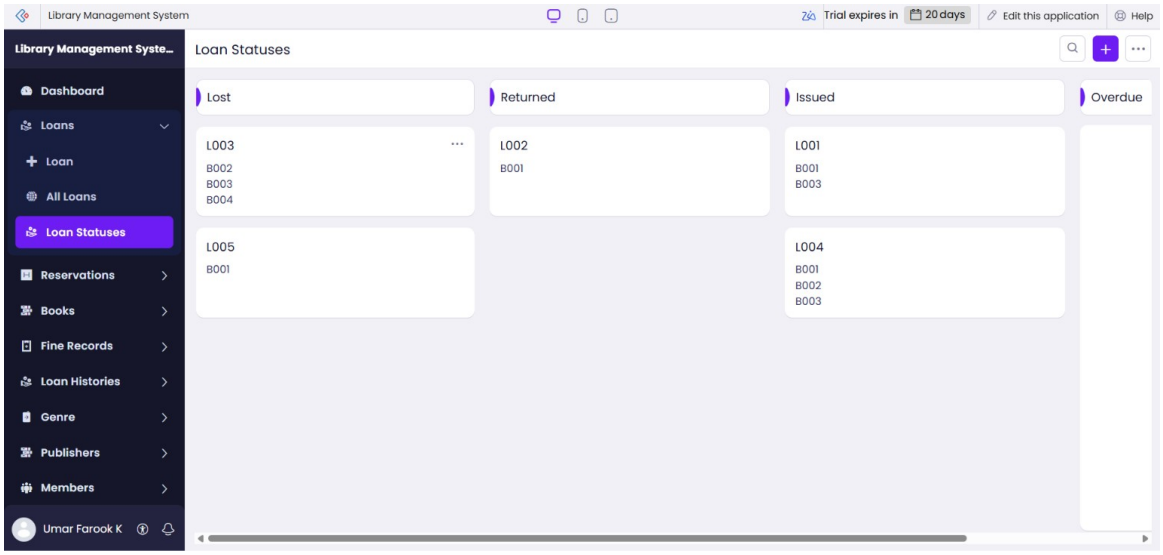

PROCEDURE:

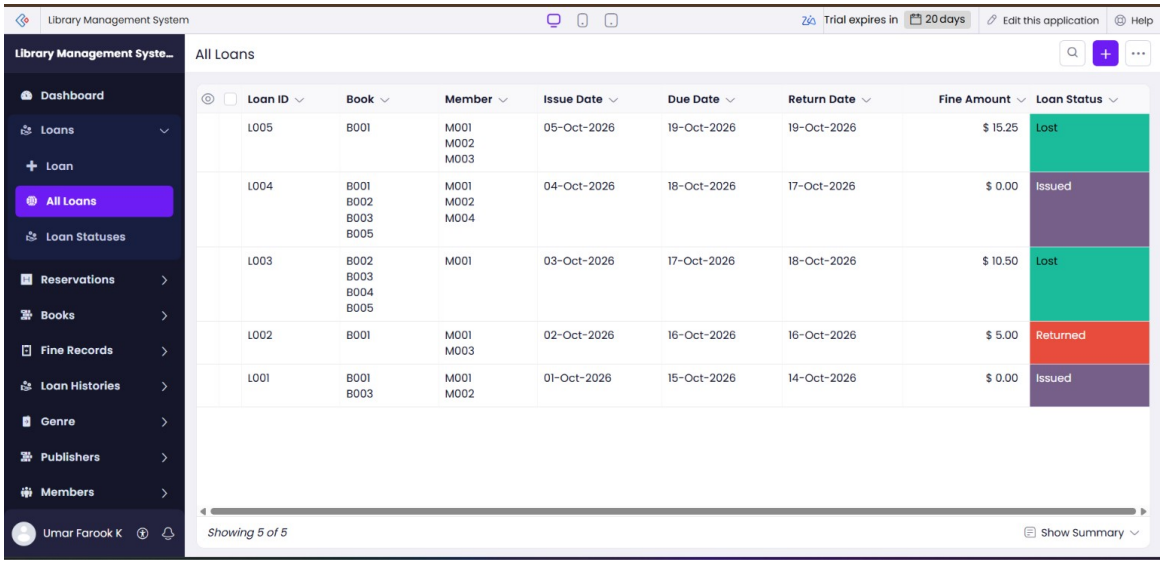

1. Sign in to Zoho Creator and click Create Application.
2. Choose the option to build the application with Zia (AI) and enter a prompt describing a Library Management System.
3. Review the forms and modules suggested by Zia (Books, Members, Loans, Reservations, Fine Records, Loan Histories, Genres and Publishers) and confirm to generate the application.
4. Open the generated application and check each form and its fields, for example Loan ID, Book, Member, Issue Date, Due Date, Return Date, Fine Amount and Loan Status in the Loan form.
5. Add sample records using the forms for books, publishers, genres, loans, reservations and loan histories.
6. Verify the records in the generated reports such as All Loans, All Books, All Loan Histories, All Publishers and the Fine Records report.
7. Check the Kanban views (Loan Statuses and Books Board), which group the records by status and genre.
8. Open the Dashboard and verify the fine summary, total copies, loan status counts, charts and quick links.
9. Save the application and capture the screenshots of each form, report and dashboard as output.

RESULT:

Thus, the Library Management System application was successfully created in Zoho Creator using Zia, and its forms, reports, Kanban views and dashboard were executed and verified.
